

Flowchart for parents: What to do if someone has symptoms of COVID-19

* A High temperature where your child feels hot to touch on their chest or back (you do not need to measure the temperature). Coughing a lot for more than an hour or three or more coughing episodes in 24 hours. Your child does not need a test if they have a runny nose, are sneezing or feeling unwell but does not have a temperature, cough or change in sense of smell or taste because these are not normally symptoms of coronavirus
